

7 Bontnick Terrace  
Regents Park.  
London. N.W.

My dear Professor Gray..

I am much obliged  
to you for your kind  
letter: I was <sup>not</sup> in the  
least aware the idea  
of a dispersion from  
N. to S. had been  
previously advanced:  
but am glad to hear  
I am not alone in  
thinking it more  
probable than along  
latitudes. If I  
can find the papers  
you allude to, at the

Limian or elsewhere  
I shall have much  
pleasure in reading  
them.

I have forwarded a  
copy of my paper  
on "Restoration", in which  
you will see that I  
have followed your  
suggestion about  
Involute & contorted;  
and which I hope  
will interest you.

Li Jock Hooker  
is on his way to you  
I had great pleasure

in marrying my niece -  
Harriet Hooker - to  
Prof. Gray, just before  
he left for America.

Believe me to be  
Dear Sir

Yours truly  
George Aschmann.

Prof A. Gray.
